

Programa Académico de Bachillerato
Universidad de Chile
Curso Biología E

Clase: Fecundación

*Dr. Enrique Castellón
Programa de Fisiología y Biofísica
Instituto de Ciencias Biomédicas
Facultad de Medicina, Universidad de Chile*

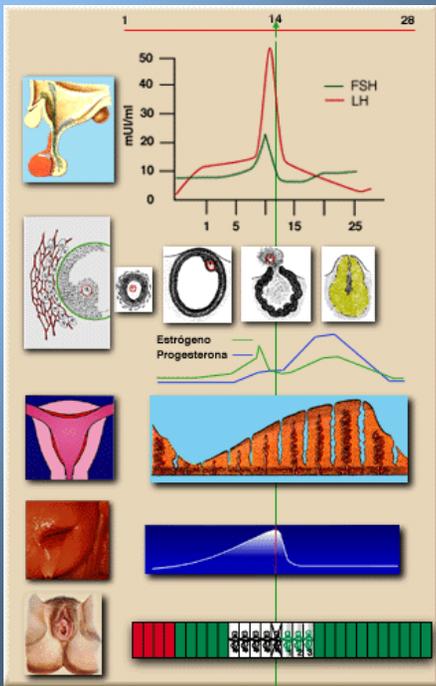

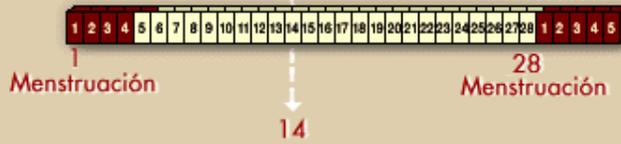

Ovulación

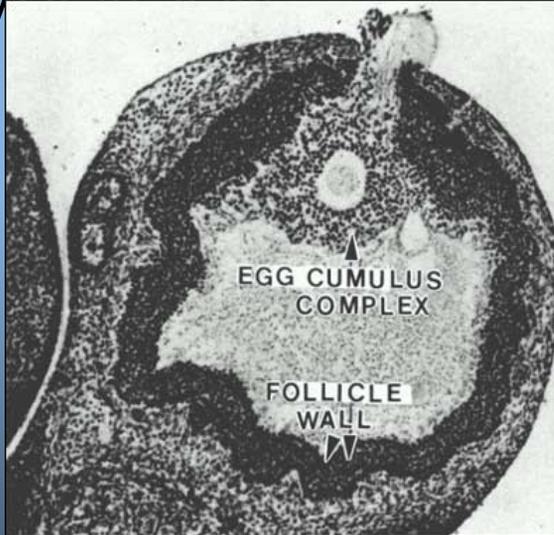

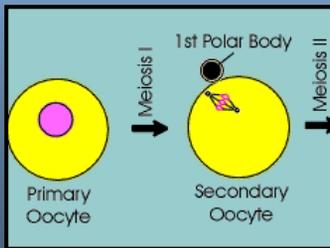

Fase Folicular

Fase Lútea

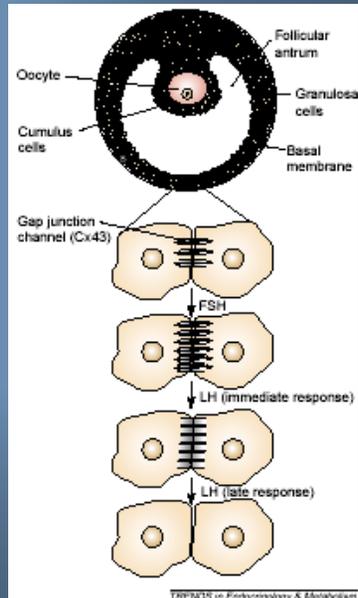

OVULACION

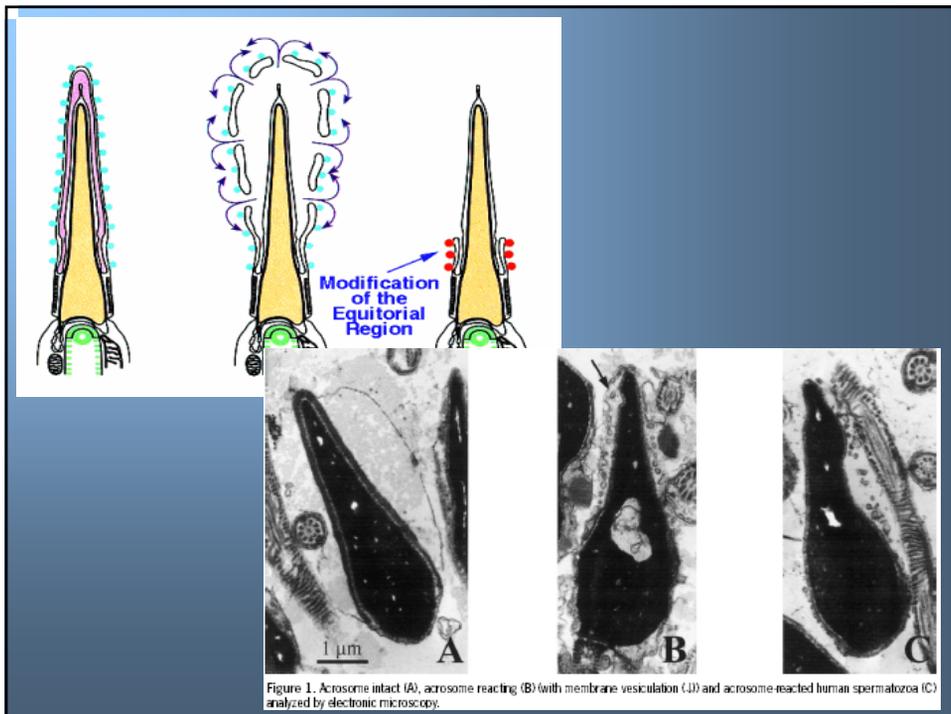

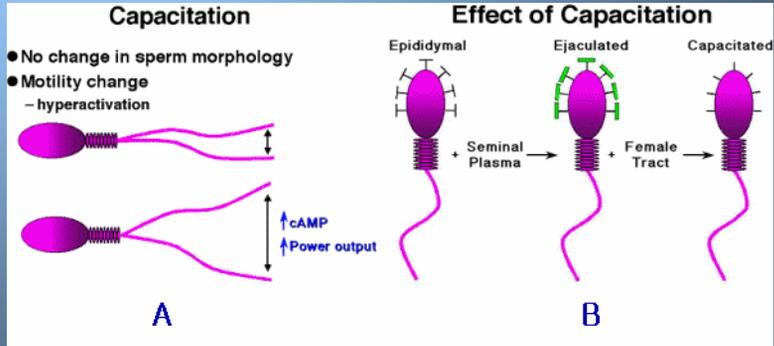

- Pulso LH y FSH
- Reactiva Meiosis
- ↓ cAMP

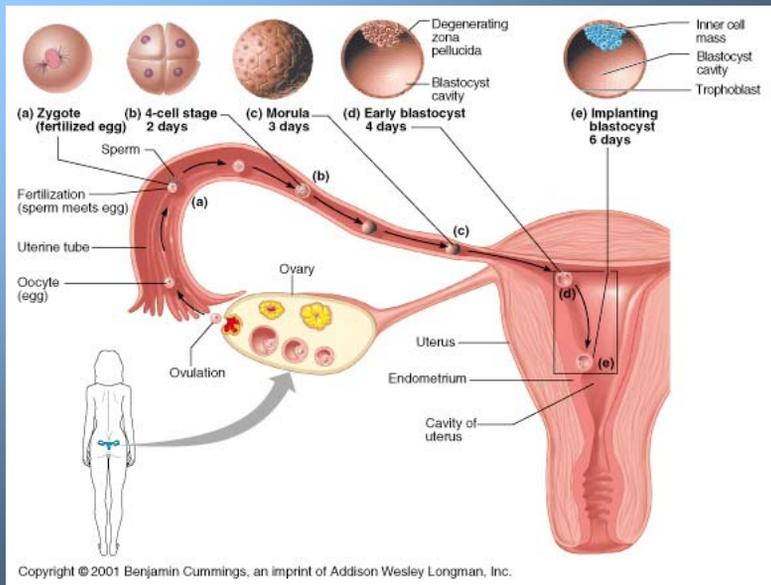

- LH/FSH
- Mucificación
- Pérdida uniones estrechas

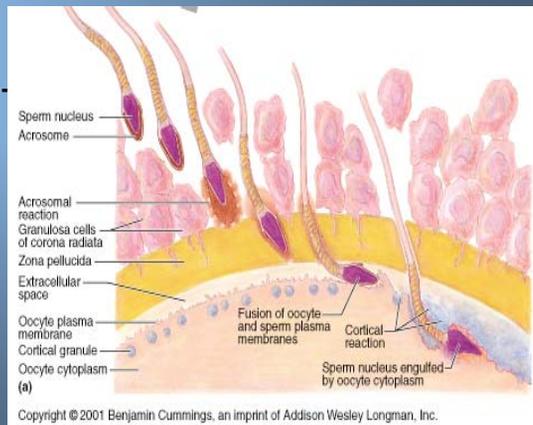

Capacitación Espermática

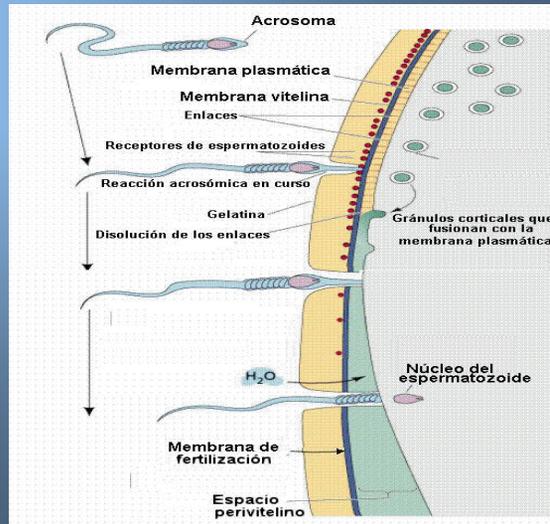

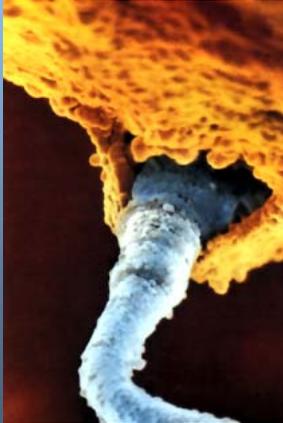

Fecundación

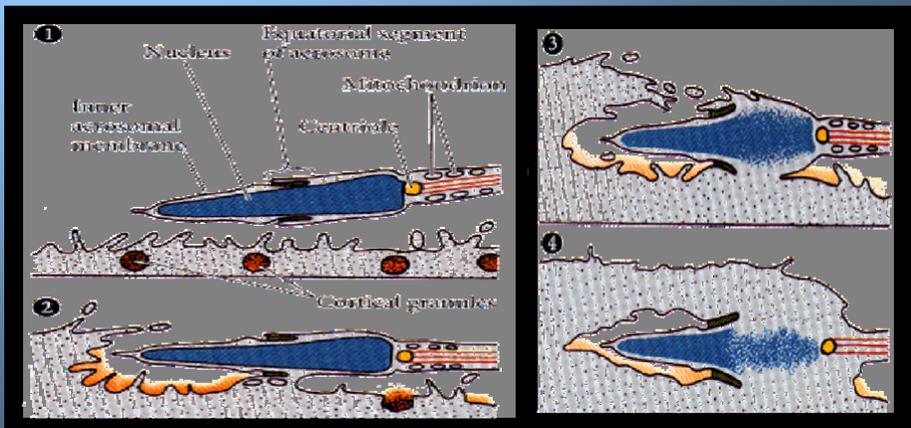

- Capacitación
- Interacción Espermio-Óvulo:
 - o Reconocimiento Especie-Específico
 - o Fusión de gametos
 - o Activación Meiotica y metabólica ovocito

Interacción Óvulo-Espermio

Fusión de Membranas

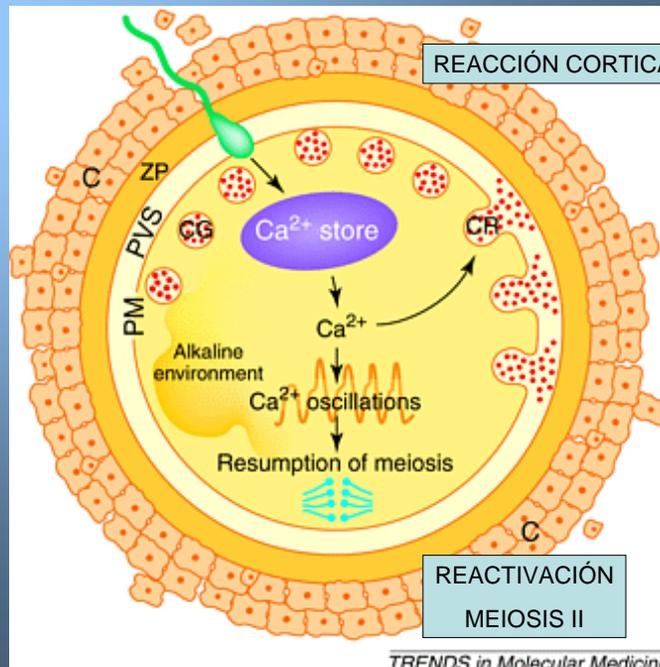

Xenopus laevis

Activación metabólica

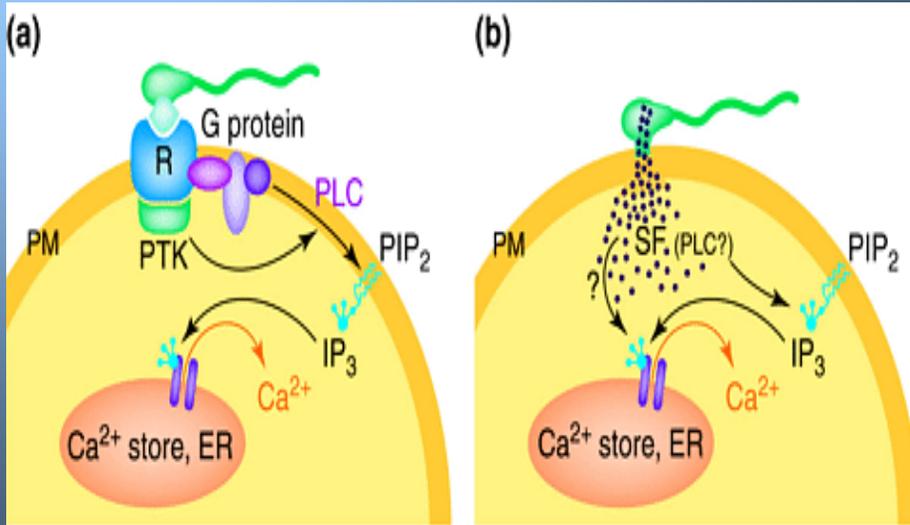

- Eventos fisiológicos, bioquímicos y morfológicos
- Estimulados por fertilización:
 - Respiración
 - Transporte de iones y aminoácidos
 - Síntesis de proteínas
 - Síntesis y activación o inactivación de kinasas y fosfatasas

Activación Ovocito

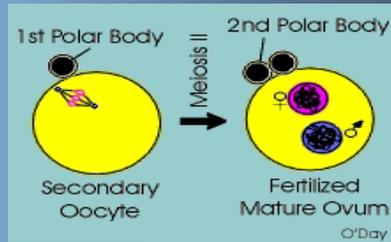

TRENDS in Molecular Medicine

Activación por espermatozoide

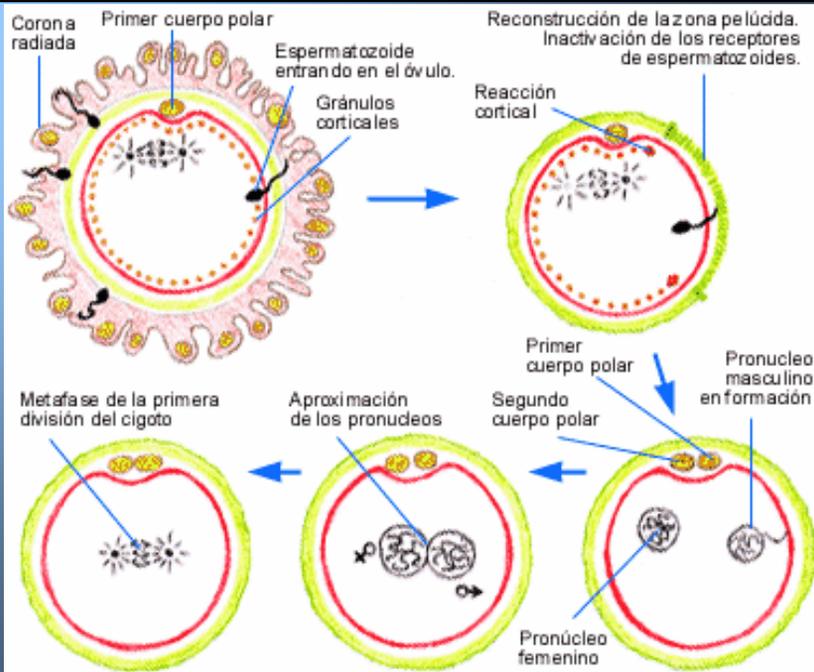

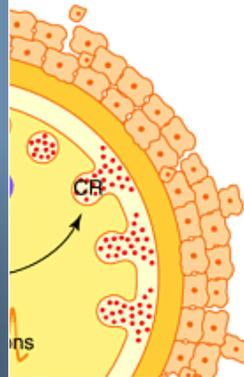

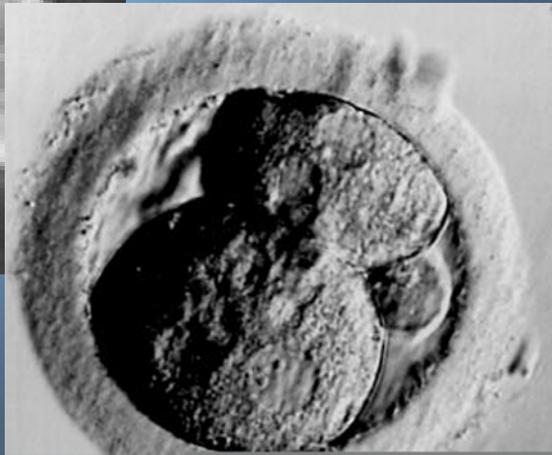

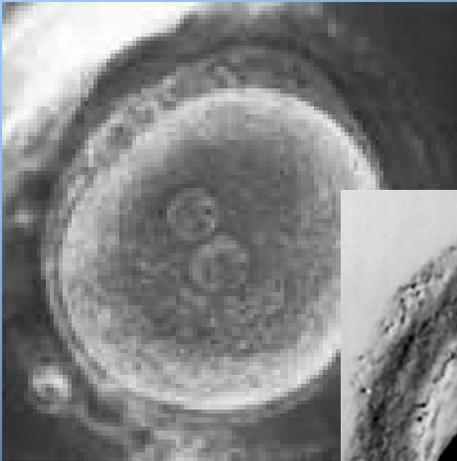

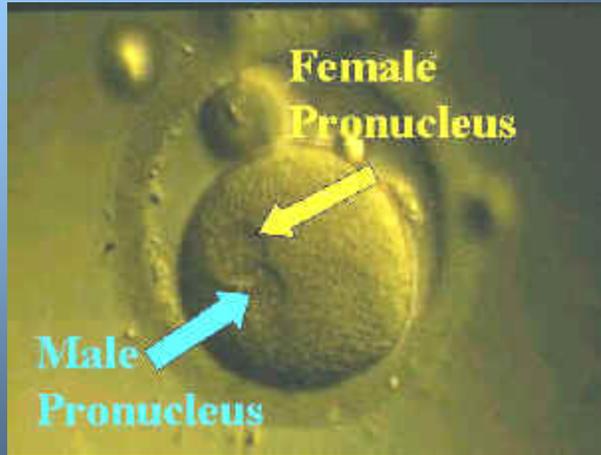

TRENDS in Molecular Medicine

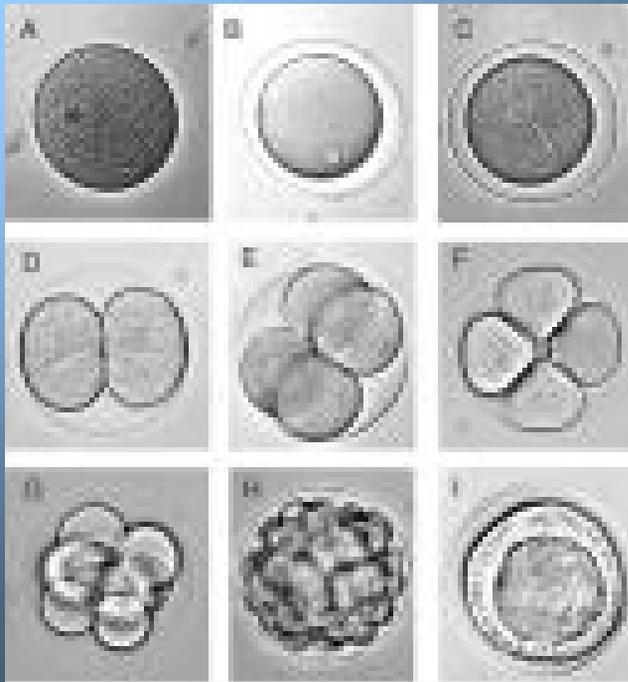

- **Reactivación Meiosis:** completa 2ª división meiotica

- **Reacción Cortical:** modifica ZP, previene poliespermia

Zigoto

Blastómero
s

Mórula
