# ScienceDirect Topics: Simplifican y mejoran el flujo de lectura con los libros y "journals" de ScienceDirect

Significado Coherente

The diagram illustrates the flow of information from a journal article to a topic page and then to related articles. It consists of three main components: a journal article, a topic page, and a list of related articles.

**Journal Article (Left):** The article is titled "Recurrent limbic and extralimbic encephalitis associated with thymoma" from the journal "Clinical Neurology and Neurosurgery". The abstract mentions "Magnetic resonance imaging (MRI) of the brain without gadolinium enhancement revealed multiple small lesions of high signal intensity on T2 and diffusion weighted images located in the cortical area beyond the temporal lobes. Brain biopsy demonstrated encephalitis with activated microglia and activated T-cell infiltration." A yellow arrow points from the abstract to the topic page.

**Topic Page (Middle):** The page is titled "Encephalitis" and includes a definition: "Encephalitis is an acute inflammation of the brain, commonly caused by a viral infection." It also features a section titled "Learn more about Encephalitis" with a sub-section "Encephalitis" by Karen L. Roos, in "Handbook of Clinical Neurology, 2014." A red arrow points from the top of the topic page to the "Significado Coherente" box.

**Related Articles (Right):** A list of related articles is shown, including "Viral Infections" by Karen L. Roos, in "Textbook of Clinical Neurology (Third Edition), 2007." A red arrow points from the "Related articles" section to the "Las palabras relacionadas" box.

**Annotations:** Three red circles with numbers 1, 2, and 3 are placed on the topic page. Circle 1 is next to the definition of Encephalitis. Circle 2 is next to the "Related terms" section. Circle 3 is next to the "Viral Infections" article.

Las palabras relacionadas

Los artículos relacionados

## Principales ventajas para investigadores y estudiantes

- ✓ Reducir el tiempo gastado saltando entre plataformas, buscando y validando información
- ✓ Aumentar la confianza en la información utilizada en el flujo de la investigación.

## Research Metrics

# CiteScore es una métrica simple para todos los journals en Scopus

CiteScore	Impact Factor
A = citations to 3 years of documents	A = citations to 2 or 5 years of documents
B = all documents indexed in Scopus, same as A	B = only citable items (articles and reviews), different from A

# Ventajas de las métricas de CiteScore

## Abarcativa

**Basado en Scopus**, la base de datos de citas y resúmenes más amplia del mundo

Las métricas de CiteScore estarán disponibles para todos los títulos seriales, **no solo para publicaciones periódicas**

Las métricas de CiteScore pueden ser calculadas para los “Portfolios” o colecciones de revistas

## Transparente

Las métricas de CiteScore están **disponibles de forma gratuita**

Las métricas de CiteScore son **fáciles de calcular por ti mismo**

**La base de datos subyacente está disponible** para que pueda interrogar

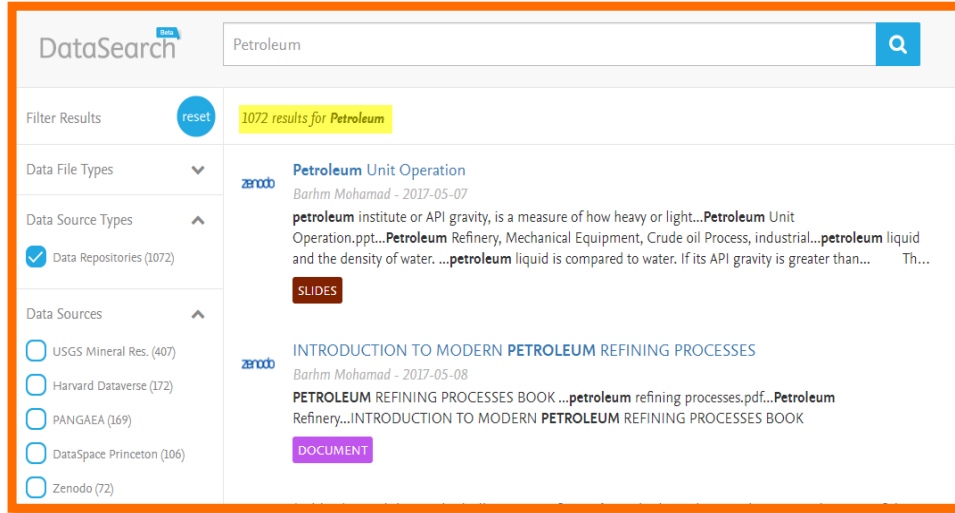

## Actual

CiteScore Tracker se **actualiza mensualmente**

Los nuevos títulos tendrán las métricas de CiteScore el **año posterior a su indexación en Scopus**

# Enlace DataSearch en Scopus

- Esta colaboración permite a los usuarios de Scopus ejecutar una búsqueda en DataSearch que coincida con su búsqueda Scopus simultáneamente con un solo clic. Tanto la búsqueda simple como la búsqueda avanzada están soportadas.

# Herramientas de Análisis

Scopus cuenta con herramientas inteligentes para rastrear, analizar y visualizar la investigación.

**Analyze search results:** Análisis con recursos visuales permite comprender mejor las métricas de su búsqueda.

**Citation Overview:** Verifica las citas recibidas por un artículo. El resumen muestra, en formato de tabla, el número de citas por año para cada artículo que usted seleccione.

**Author Profile Page:** Es posible analizar con facilidad la producción científica de un individuo. Ver sus citas y recuento de documentos, índice h y acceder a una mejor imagen de un individuo, sus publicaciones e influencia.

**Compare Journals:** Trae el comparativo de diferentes revistas usando una variedad de métricas.

Friedrich Miescher Inst., CH-4002 Basel, Switzerland

Abstract

A method has been devised for the electrophoretic transfer of proteins from polyacrylamide gels to nitrocellulose sheets. The method results in quantitative transfer of proteins from gels containing urea. For sodium dodecyl sulfate gels, the original band pattern was obtained with no loss of resolution, but the transfer was not quantitative.
