

P1]

$$m_1 + m_2 \equiv M$$

$\rho_0$ : densidad del agua

$\rho_h$ : densidad del hielo

(a) Antes que el hielo se derrita:

$$\uparrow E = \rho_0 V_2 g \quad \rho_0 V_2 g = M g$$

$$\downarrow M g \quad \text{y como } m_2 = \rho_h \cdot V_2 \rightarrow V_2 = \frac{m_2}{\rho_h}$$

$$\Rightarrow \rho_0 \frac{m_2}{\rho_h} = M$$

$$\Rightarrow \boxed{m_2 = \frac{\rho_h}{\rho_0} M}$$

-

(b) Antes que el hielo se derrita:

$$\begin{matrix} \text{volumen del} \\ \text{recipiente} \end{matrix} = V_2 (\text{hielo}) + V_3 (\text{agua}) \equiv ①$$

Después que el hielo se derrita, hay que comparar

$$V_1 (\text{agua}) + V_2 (\text{agua}) + V_3 (\text{agua}) \equiv ② \text{ con } ①$$

Si  $② > ①$  el agua se rebalsa

$② = ①$  se mantiene el nivel

$② < ①$  baja el nivel

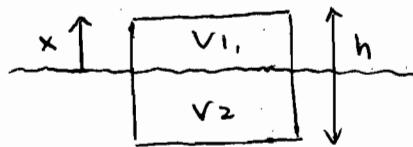

$$① = \frac{m_2}{\rho_h} + V_3 = \frac{1}{\rho_h} \cdot \frac{\rho_h}{\rho_0} \cdot M + V_3 = \frac{M}{\rho_0} + V_3$$

$$② = \frac{m_1}{\rho_0} + \frac{m_2}{\rho_0} + V_3 = \frac{m_1 + m_2}{\rho_0} + V_3 = \frac{M}{\rho_0} + V_3$$

$$① = ② \Rightarrow \text{el agua mantiene el nivel.}$$

Datos: M, S, P<sub>0</sub>

if?

P<sub>0</sub>

$$\begin{array}{l} \uparrow E \\ \downarrow M g \end{array}$$
$$E - M g = M \ddot{x}$$
$$P_0 v_2 g - M g = M \ddot{x}$$
$$\text{pero } v_2 = S(h-x)$$

$$\Rightarrow P_0 S(h-x)g - M g = M \ddot{x}$$

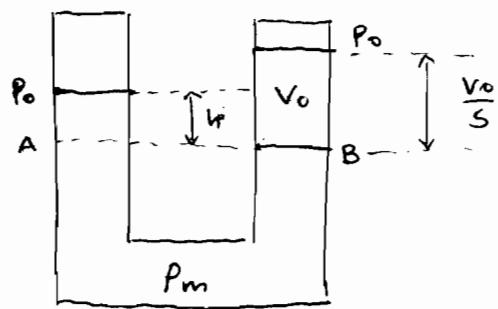

$$\Rightarrow \ddot{x} - \frac{P_0 S g}{M}(h-x) + g = 0$$

$$\Rightarrow \ddot{x} + \underbrace{\frac{P_0 S g}{M}}_{\omega^2} \left( x - h + \frac{M}{P_0 S} \right) = 0$$

$$\Rightarrow \boxed{\text{if} = \frac{1}{2\pi} \sqrt{\frac{P_0 S g}{M}}}$$

P<sub>3</sub>]

Datos:  $s, p_m, v_0, h \quad ? \rho?$

$p_m$ : densidad mercurio  
 $\rho$ : densidad desconocida

$$P_A = P_0 + p_m g h$$

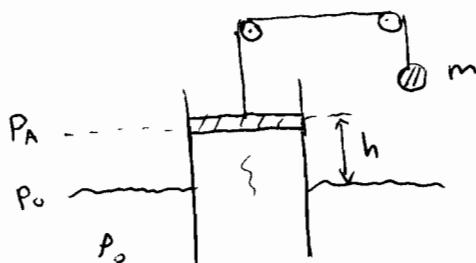

$$P_B = P_0 + \rho g \frac{v_0}{s}$$

$$P_A = P_B \Rightarrow P_0 + p_m g h = P_0 + \rho g \frac{v_0}{s}$$

$\Rightarrow$

$$\boxed{\rho = \frac{s \cdot h \cdot p_m}{v_0}}$$

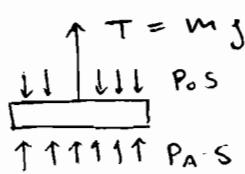

P<sub>4</sub>]

Datos:  $s, P_0, m \quad ? h?$

$$P_0 = P_A + \rho g h \Rightarrow P_A = P_0 - \rho g h$$

DCL símbolo

$$T - P_0 S + P_A S = 0$$

$$mg - P_0 S + P_0 S - \rho g h S = 0$$

$$\Rightarrow \boxed{h = \frac{m}{\rho g s}}$$
