

Example:

According to the example table below, the combination with ID 1 was used, which is composed of customers 104 and 135, thus orders to be delivered to those two customers are sent in the same truck. Also, CombID 5 was used, which is composed of customers 203, 189, and 138. CombID 6 was also used, which is composed of client 267 only, and it was sent through platform 4. Note that the combination ID will be assigned by you, and can be quite arbitrary, as long as it is unique.

VSTEL	CombID	KUNNR	Platform
PR01	1	104	
PR01	1	135	
PR01	5	203	
PR01	5	189	
PR01	5	138	
PR01	6	267	4
