

GF5025: Sistemas de observación de la atmósfera

Lidars y Nefobasímetros. Parte 2: Uso de datos de CL31

- ejemplos de fenómenos
- "visita virtual" al instrumento
- manual del instrumento
- seteos
- formatos de datos
- instalación: PC/log/reloj
- operación: limpieza
- datos
- QC/QA
 - recomendaciones
 - efecto de vapor
 - calibración absoluta

Aerosol backscatter profiles from ceilometers: validation of water vapor correction in the framework of CeiLinEx2015

Matthias Wiegner¹, Ina Mattis², Margit Pattantyús-Ábrahám^{2,a}, Juan Antonio Bravo-Aranda^{3,b}, Yann Poltera^{4,c}, Alexander Haeferle⁴, Maxime Hervo⁴, Ulrich Görndorf⁵, Ronny Leinweber⁵, Josef Gasteiger⁶, Martial Haeffelin³, Frank Wagner^{2,d}, Jan Cermak^{7,e,f}, Katerina Komínková⁸, Mike Brettle⁹, Christoph Munkel¹⁰, and Kornelia Pönitz¹¹

A Technique for Autocalibration of Cloud Lidar

EWAN J. O'CONNOR, ANTHONY J. ILLINGWORTH, AND ROBIN J. HOGAN
