48,000 people. 49 countries. Over 120 office locations.

We're not just engineers. We're a global team of data scientists, consultants, construction workers and innovators all working to create a better tomorrow. Every day, we help customers in energy, chemicals and resources get one step closer to solving our planet's toughest issues. Climate change. The energy transition. Digital transformation. And how we can deliver a more sustainable world.

Whatever your ambition, there's a path for you here. And there's no barrier to your potential career success . For more information, visit [Worley.com](https://www.worley.com)

Purpose

Provides oversight and technical direction to a group of people in project management, including project engineering coordinators, project engineers, project managers, and portfolio managers under the administrative guidelines of the company. Accountable for the identification, selection, hiring, training and development of people and managing their assignments. Accountable for delivery of projects in compliance with company requirements. Plans, organizes, manages, and controls department budgets with the established policies, procedures, systems, and requirements approved by Worley

Functions

- Responsible for a project management department or sub-group of 30 or less. Operational leaders implementing strategies within a complex area requiring a broad grasp of practices or principles in a highly specialized field or in cross-functional setting. Generally manage work through others. Will have a high degree of autonomy operating within general management direction and functional policies. May manage work directly or through others. May also be assigned a Project Management role on a project, program or portfolio.
- Assists business development activities by facilitating the maintenance of personal profiles and resumes, tracking existing capabilities, and strategically addressing future customer capability requirements. Encourages positive working relationships with external parties such as the customer, suppliers, and contractors. May be involved in networking, negotiations, strategic alliancing, and cost savings efforts. Stewards the maintenance of pricing records reflecting the effort to complete discipline activities. May support proposals by developing the project execution strategy, reviewing costs, writing proposal content, and presenting to customers. May be called upon to lead part or all of a proposal.
- Responsible for planning, managing and delivering project management operations in accordance with the business plan. Controls project management staffing levels and organizational structure. Ensures mentoring and training requirements are met. Manages the
